- Volunteering at events – Reflects teamwork and community involvement
- Gaming – Especially relevant if you're into creative computing or tech
- Fitness and outdoor activities – Shows discipline and energy
- Reading tech blogs

Languages

- English
- Urdu

Eager to contribute to a professional organization that values and utilizes my skills and experience. Seeking opportunities for growth, learning, and long-term career advancement in a dynamic environment.

Work Experience

Web Developer and Designer

I created a personal website using HTML, CSS, and JavaScript to showcase my projects and experiments, available at <https://m0hxn.github.io>. It highlights my front-end skills, self-learning efforts, and overall growth in web development.

I also built a dedicated projects page at <https://m0hxn.github.io/pages/projects.html>, where I display various coding experiments. This page reflects my practical experience and interest in exploring different web development techniques.

In addition, I developed a website for a company, live at <https://bsu-live.github.io>. I was responsible for the front-end design using HTML, CSS, and JavaScript, ensuring the site was responsive and user-friendly. This project gave me valuable real-world experience and improved my ability to meet client-specific requirements.

Administrative & Inventory Coordinator

Manager, Fujairah | Mar 2025 – Apr 2025
Managed operations, inventory, and logistics for promotional events. Handled documentation, scheduling, vendor coordination, and report preparation. Ensured smooth execution of campaigns and efficient stock tracking.

Education and Qualifications

Creative Computing BSc (Hons)

Bath Spa University, Ras al Khaimah, UAE
Sep 2022 – Sep 2025

- Developed a strong portfolio showcasing creative and technical skills in coding, games, and web development.
- Collaborated with peers on professional creative industry projects.
- Gained hands-on experience in 3D animation, game development, responsive web design, and creative AI.
- Acquired in-demand skills through practical coursework and industry-facing projects.

Key Modules & Highlights:

- Year One: Focused on foundational programming, experience design, visual arts coding, and digital storytelling.
- Year Two: Advanced object-oriented programming, real-time data handling, and live projects with industry partners.
- Year Three: Led professional, multidisciplinary projects, with emphasis on entrepreneurship and career readiness.
